## QC11Y/K SERIES HYDRAULIC SHEARING MACHINE

### I. Brief Introduction:

- 1, Sheet plate welded structure is adopted, with hydraulic transmission and accumulator return, typical of an easy operation, reliable performance, and nice appearance.
- 2, Indication by indicator is provided for adjustment of blade clearance, for a handy and prompt adjustment.
- 3, Alignment device with lighting and control device for shearing stroke bar and to reduce frictional resistance.
- 4, Rolling material support ball is provided, to minimize fish tail with sheet bar and to reduce frictional resistance.
- 5, Rear stopper is fitted with electric adjustment and manual adjustment devices, and digital device is available for display if size of stopper and times of shearing
- 6, Rear stopper is fitted with coder and digital display system, So that the position of rear stopper is displayed more accurately, thus to further enhance the shearing precision if this machine.

### **About Us**

Shanghai Kingdom International Trade Co., Ltd. (SKITC), with the merit of being adjacent to Shanghai International Financial Center and Shanghai International Shipping Center, aims at providing highly efficient metal processing solutions through our local factories in China. Products from SKITC include hydraulic ironworkers, punching machines, bending machines, cranes et al., which have strong customer base and excellent evaluation from customers in Asia, Africa and Latin-America.

SKITC has developed long term cooperation with a number of universities and research institutes in China. SKITC has world class teams for R&D and services. Most R&D team members have Ph.D. degree or M.S. degree in top universities in China. Team members are proficient in mechanical design, manufacturing and energy saving. SKITC can provide customized solutions, including product design, function optimization and cost reduction, according to customers' needs. The purpose of our work is to improve customers' production efficiency. Our excellent design capabilities enable our products leading in industry. Our elite teams can provide customers with professional, customized, and all-round services around the clock.

By believing the philosophy of “dedicated to increasing your efficiency” and having elite teams in R&D and services, we would like to cooperate with elites from all over the world, provide world class facilities for our customers and promote the development of foreign trade together.
