SHEARING MACHINE

QC12Y/K SERIES HYDRAULIC SHEARING MACHINE

I. Brief Introduction:

- 1, Sheet plate welded structure is adopted, with hydraulic transmission and accumulator return, typical of an easy operation, reliable performance, and nice appearance.
- 2, Indication by indicator is provided for adjustment of blade clearance, for a handy and prompt adjustment.
- 3, Alignment device with lighting and control device for shearing stroke bar and to reduce frictional resistance.
- 4, Rolling material support ball is provided, to minimize fish tail with sheet bar and to reduce frictional resistance.
- 5, Rear stopper is fitted with electric adjustment and manual adjustment devices, and digital device is available for display if size of stopper and times of shearing
- 6, Rear stopper is fitted with coder and digital display system, So that the position of rear stopper is displayed more accurately, thus to further enhance the shearing precision if this machine.
